
Wishlist from a medical physicist - what ion imaging should/could do in practice

Ranald Mackay*¹ and Joël Herault*²

¹Christie Medical Physics and Engineering – United Kingdom

²Centre Antoine Lacassagne de Nice – Centre Antoine Lacassagne de Nice – France

Abstract

The title says it all: We hope to trigger a fruitful exchange between the more technically minded participants and those coming from the clinical side. After a short introduction by medical physics experts Ranald Mackay (Manchester, UK) and Joël Herault (Nice, France) on the clinical routine point of view of proton therapy, we will jump into the open discussion.
